

# Protect the vulnerable

## Slow the spread of COVID-19

With rapid widespread access to disinfectant

### Challenge

Protection from COVID-19 requires routine and frequent use of a surface disinfectant; however, disinfectant is unobtainable to billions of people globally.

### Solution

**Electro-Clean** is a low-cost production process for a powerful chlorine-based disinfecting solution that has been approved by WHO<sup>1</sup>, EPA<sup>2</sup>, and CDC<sup>3</sup>.

### Access

The disinfecting solution is produced using globally available low-cost materials, with instructions provided online and through local partners.
